#### MICRODERMABRASION

A progressive, non-invasive resurfacing treatment that propels natural mineral crystals onto the skin. An effective tool in the battle against aging! Treats fine lines, wrinkles, sun spots and large pores, and smooths rough complexions. Most effective as a series of treatments.

PER SESSION \$110  
SERIES OF 6 \$550

#### RAPID EXFOLIATING PEELS

Refine the texture of your skin with a peel utilizing Alpha Hydroxy Acids and enzymes. Helpful in reducing fine lines and undesirable pigmentation, and in clearing acne.

### WAXING

Waxing facial and body hair is an excellent alternative to shaving. Waxing removes not only visible hair but roots as well, which means you'll experience smooth, stubble-free skin for weeks, not days. (Waxing is not recommended for people with varicose veins or during the menstrual cycle).
